DETAILED ACTION

Allowable Subject Matter

Claims 1-27 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for authenticating a network device or client. Each independent claim identifies the uniquely distinct features of "resending the certificate to the other network device; comparing the resent certificate to the stored certificate; and if the resent certificate and the stored certificate are determined to be substantially the same, receiving authentication". The closest prior art, Mitty (US 6,145,079), discloses a conventional method for authentication of a client or device using certificate chains fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
